

Type S0 Single Stage Pressure Regulators

The **S0 series regulators** are a line of direct action type pressure governors, normally used for domestic applications, generally installed directly to the meter or in installations in gas grids for natural and manufactured gas, lpg, or other noncorrosive preliminarily treated stable gas.

SPECIFICATIONS

H (angle horizontal connection) / M (straight connection)

Body Material: Aluminium / Painted

Inlet Pressure: 0.2 ÷ 5 / 1 ÷ 5 mbar

Outlet Pressure: 12 ÷ 50 mbar / 150 ÷ 400 mbar

Nominal Capacity: Up to 15 Nm³/h

Working temperature: -20 ÷ +60

Inlet Connections: 1/2" ; 3/4"

Outlet Connections: 1/2" ; 3/4"

MADE IN ITALY
