

Type S24 Pilot Operating Pressure Regulators

S24 are a new **line of pressure regulator** – pilot-controlled – suitable for use in canalized nets of low and medium pressure with non-corrosive gas filtered at first.

The feature peculiar of **S24 regulators** is the trivalent operating, i.e. in a single body is united the following operations: main regulator, monitor, shut-off valve.

Special use of a single body allows to reduce overall dimensions of regulation units and solve problems of replacement or conversion of existing units out of standard.

SPECIFICATIONS

Body Material: Iron / Painted

Inlet Pressure: 20

Outlet Pressure: 10 – 12000 mbar

Nominal Capacity: request more information

Working temperature: -20 ÷ +60

Inlet Connections: DN25 – DN40 – DN50 – DN 80

Outlet Connections: DN25 – DN40 – DN50 – DN 80

MADE IN ITALY
