

Type S26

Safety Devices for Pressure

S26 safety valves are a new line of products – direct operating type – designed to guarantee a utmost easiness in use.

These devices are usually used in distribution and industrial systems and are designed to be installed in regulation units in gas grids of natural, manufactured and lpg gas or other non corrosive gases, filtered at first.

SPECIFICATIONS

Body Material: Aluminium / Iron / Painted

Inlet Pressure: 6 or 20

Outlet Pressure: 10 – 4000 mbar

Nominal Capacity: request more information

Working temperature: -20(-30) ÷ +60

Inlet Connections: 1"; DN40; DN50; DN80

Outlet Connections: 1"; 1 1/2"; DN40; DN50; DN80

MADE IN ITALY
