

Type S5

Spring Loaded Double Pressure Regulators

The **S5 regulator** due to their operating specifications are mainly used in those system where sudden capacity variations are required, or else, where the cut-off of the gas distribution is controlled by solenoid valve.

They can be used with natural gas, air, propane and other gases, as long as they do not contain a high percentage of benzole.

SPECIFICATIONS

Body Material: Aluminium / Iron / Painted

Inlet Pressure: 0.1 ÷ 8.6

Outlet Pressure: 9 ÷ 380

Nominal Capacity:

Working temperature: – 20 °C ; + 60 °C

Inlet Connections: 1" ; 2"

Outlet Connections: 1"; 1"1/4; 1"1/2; 2"
